

Umbrella

Take a thin piece of yarn and glue it into a J shape on a piece of construction paper. This is going to be the handle of the umbrella.

Glue a cotton ball on top of the yarn. Take a cupcake holder and cut it in half. Put glue around the edges and place over the cotton ball, gluing the holder onto the construction paper.

Once the glue is dry, your child can draw a picture around the umbrella and add little raindrops.

Place glue drops onto the paper and sprinkle glitter onto them. Shake off any excess glitter.

Paper Plate Umbrellas

Materials: Large paper plates, markers and crayons.

Description: Get a paper plate with a small hole poked in the middle. Let the children decorate the back of their plate with crayons or felt tip markers. When they have finished, have them stick their index fingers up through the holes in their plates to make the umbrellas.

It's raining, It's raining,
Oh me, oh my!
But our umbrellas will keep us
dry!
