

Find a large shoe box or a piece of black card.

Cut out 3 circles in the center of the box or card to represent where the 3 lights would go. Take a piece of red, yellow, and green cellophane and glue them in the appropriate circles.

If you haven't got any cellophane you can stick the coloured paper on black card or paper.

Talk about what each light means. You can flash a flashlight behind each light while you are talking about it or use your stop sign when playing red light, green light
